COURSE: Syringe Driver Training

LEARNING OUTCOMES:

1. Explain the reason for selecting the use of a syringe driver to administer patient medication;
2. Demonstrate awareness of the risk management issues and the limitations of the Syringe Driver device.
3. Set up, prime and check the syringe driver ready for use;
4. Demonstrate the safe administration of drugs via syringe driver devices within the scope of your own hospital or health centre's policy guidelines.
5. Know how and where to access help.

TARGET GROUP: Registered Nurses

DURATION: 3 hours
